

HD Ready with iDTV encased in a beautifully designed small screen

Continuing the tradition of award winning design is the R8 range which replaces the most popular LCD of 2006 the R7 range. The new R8 range has a beautiful elegant design with flowing curves that will make this LCD the centre piece of any living room. But the R8 is not just a pretty face, the new range boasts new enhanced technology and up to 3HDMI sockets for superb connectivity. Advanced features like Movie Plus, Wide Colour Enhancer and Game Mode ensures the R8 range is the perfect mix of design and technology.

HD ready

HDTV allows you to experience television like never before with the widest range of colours and the clearest images. High Definition contains four or five times as many pixels making the image much clearer than standard definition.

game mode

SAMSUNG LCD TVs offer unparalleled picture quality that can be optimised for gaming at the touch of a button. It allows for H-sharpness and a faster response time in the games. In addition, its

wide colour enhancer

This exclusive technology delivers more brilliant colours, even in bright areas of the picture where blues and greens are washed out on conventional screens. The system presents a wider colour gamut and four times as many colour gradations, showing you true colours; the fresh green of spring foliage, and the intense blue of the summer sky.

powerful surround sound effects produce a magical environment of wonder that is filled with excitement and joy.
